The SSI Program *is an advance site selection initiative designed to identify optimal greenfield sites for quality job-producing projects. The SSI Program increases community competitiveness in economic development by strengthening the quality of available industrial and commercial sites. Developed from consulting expertise in site selection, engineering, landscape architecture, and environmental science, SSI sites strike a balance between facility construction requirements and environmental stewardship. An investment in a quality sites inventory enables communities to respond confidently to RFI opportunities and proactively market to prospects worldwide.*

The SSI Program was developed with a single strategy in mind: ***quality sites = quality projects = quality jobs.***
