SSI
PROGRAM

Indiana SSI / ZoomProspector

SITE COMPARISON PROJECT

LEOTTA
LOCATION + DESIGN

Project Description

Conduct a site-by-site comparison to determine overlap between SSI Phase I sites and sites listed in the Indiana ZoomProspector (ZP) database.
SSI Sites are given a Tier level value based on varying degrees of coincidences between SSI and ZP sites.

Purpose of Project

Demonstrate the volume of new potential greenfield sites produced through SSI Phase I: Site Discovery.

Approach

- Utilize GIS-based spatial analysis to determine site boundary intersection for SSI Phase I sites and ZoomProspector sites.
- Initial analysis is applied to SSI Phase I sites with a ranking of 4.0 or higher.
- A grading scale for how closely intersecting boundaries match is applied.
  - ZP-EM = Exact Match
  - ZP-SM = Substantial Match
  - ZP-PM = Partial Match (pending review)
  - ZP-PR = Proximate to ZP Site
  - ZP-NM = No Match
- Tier levels (1-4) are formed based on SSI-ZP date added comparison.

Objectives

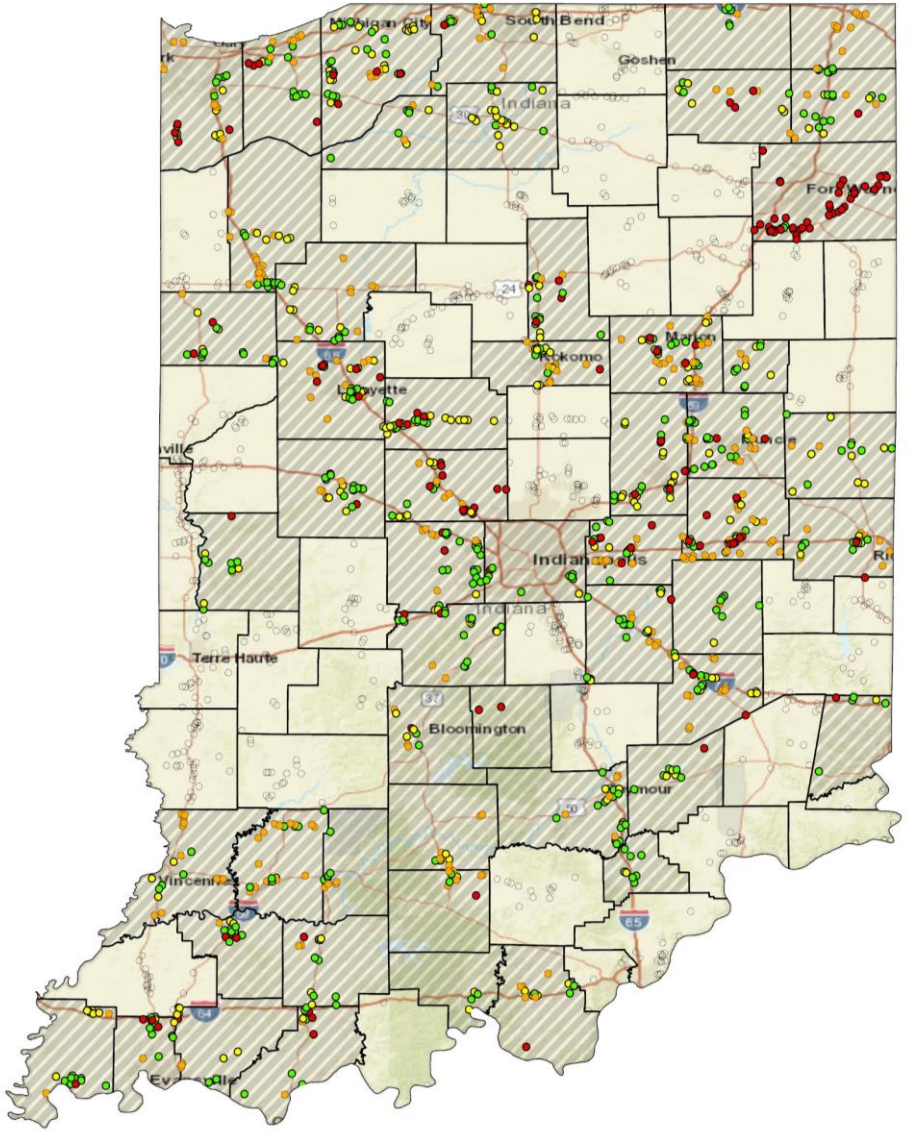

- Gain a quantitative understanding of SSI Phase I and ZoomProspector site coincidence.
- Infer an indication of ZoomProspector site quality based on overlap with 4.0+ ranked SSI Phase I sites.
- Derive percentage of new potential greenfield sites where SSI Phase I sites do not intersect ZoomProspector sites.
- Create GIS-based site boundaries for ZoomProspector sites where property listings do not have a defined boundary.
- Provide site boundaries to property listing managers to load into ZoomProspector for map display.

Findings Summary – Local Sites Review

Local Site Review Workshop Stats:

- 54 out of 92 counties reviewed
- 1, 096 out of 1,743 sites in counties that have completed SSI workshops
- 406 reviewed sites with 4.0+ ranking
- 647 Sites in counties that have not completed SSI workshops.

SSI Sites by Ranking, Reviewed/Unreviewed

Findings Summary – Tier Levels

SSI-ZP Site Tier Descriptions:

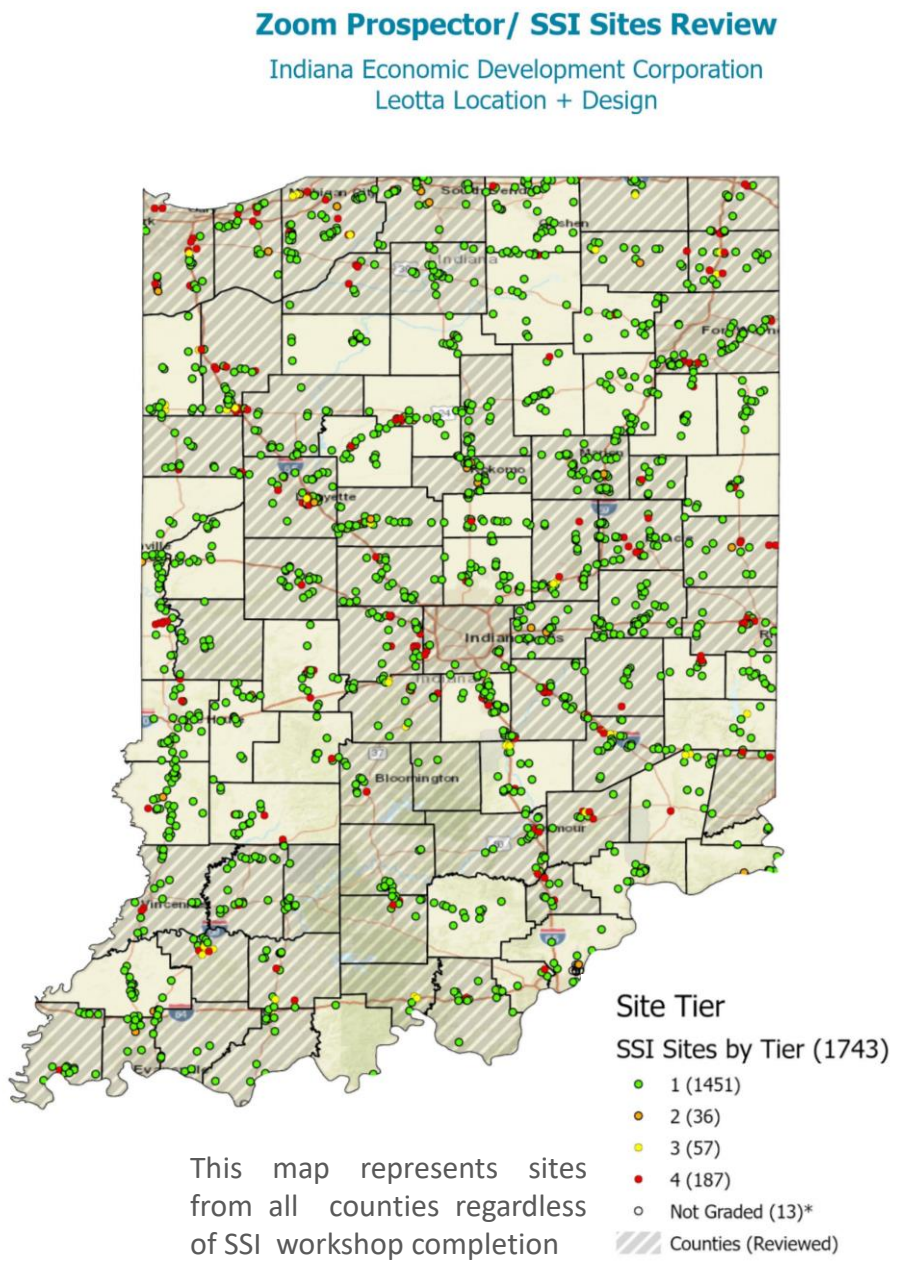

Tier 1: ZP-NM, ZP-PR
- Unique sites located by the SSI program that are not yet added to the ZP portal.

Tier 2: ZP-EM, ZP-SM
- Unique sites located by the SSI program that were reviewed during the Phase I local review workshop date and subsequently added to the ZP portal.

Tier 3: ZP-PM
- SSI sites that share a boundary or some area of a current ZP site.
- The ZP site could be altered based on SSI findings, or ZP site was unable to be confidently identified. Further review needed.

Tier 4: ZP-EM, ZP-SM
- SSI sites that already existed in the ZP portal prior to the local review workshop.
- Identification through SSI Phase I confirms ZP site validity.

*13 sites were found to be duplicates and were not given a grade. These sites were reviewed under the SSI workshop so were left in the overall count.

This map represents sites from all counties regardless of SSI workshop completion

Findings Summary – Tier Level Detailed Breakdown

Tier & Sub-Grade		Total Count	Site Rank Breakdown							Tier Description
			0	1	2	3	4	4.5	5	
Tier 1		**879**								SSI sites discovered and not added to the Zoom Prospector Portal
	ZP-NM	847	123	103	169	219	146	33	54	
	ZP-PR	32	10	0	3	3	5	4	7	
Tier 2		**29**								SSI sites discovered and added to Zoom Prospector Portal
	ZP-EM	12	0	1	1	0	3	4	3	
	ZP-SM	17	4	1	2	3	2	0	5	
Tier 3		**43**	7	0	0	4	13	6	13	Unreconciled SSI and Zoom Prospector sites - Needs further review
Tier 4		**145**	14	3	6	14	36	15	57	Existing Zoom Prospector sites confirmed by SSI Review.
Totals		1096	158	108	181	243	205	62	139	

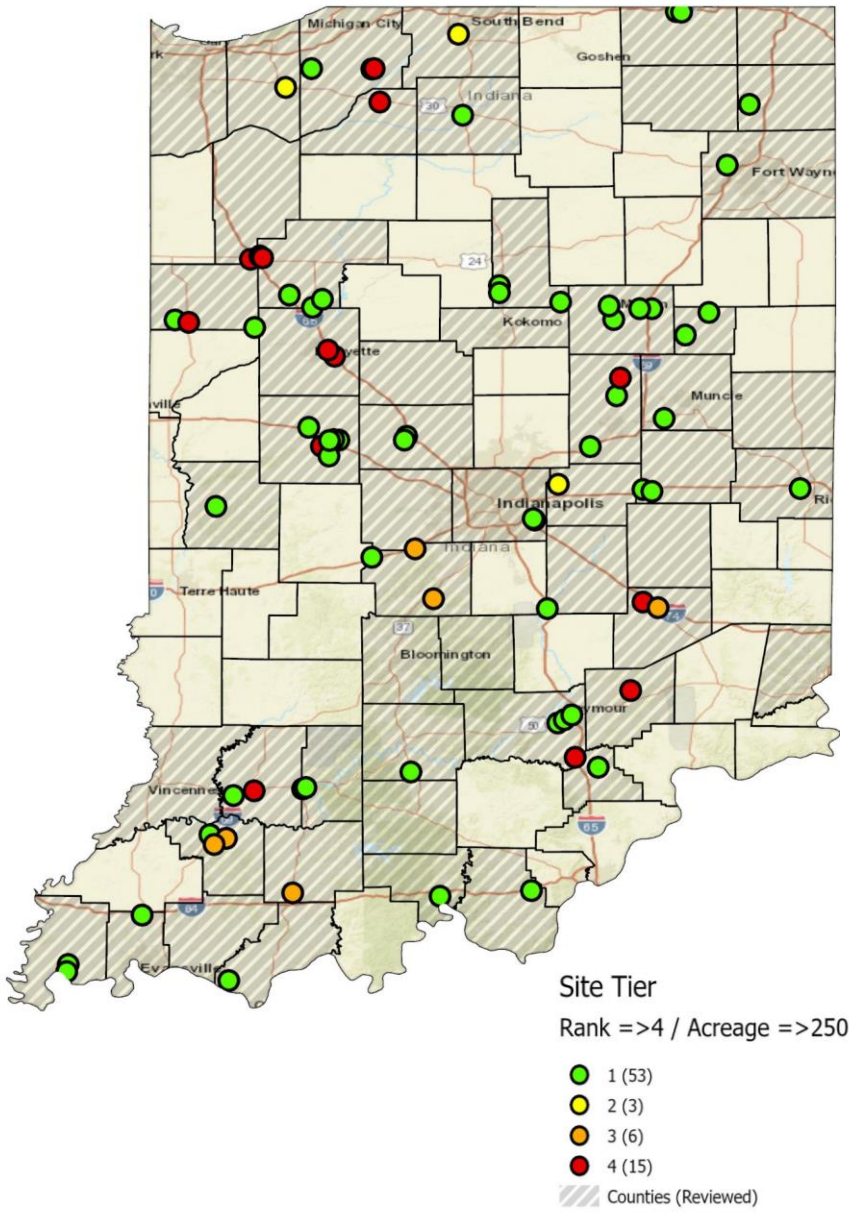

This table represents sites only in counties that have completed the SSI Workshop.
All SSI sites subject to further analysis.

Findings Summary – Tier Levels for Sites greater than 250 Acres and 4.0+ SSI Rank

406 sites with an SSI Rank of 4.0 or greater, 77 of those contain 250 or more acres.

Tier & Sub-Grade		Total Count	Site Rank		
			4	4.5	5
Tier 1		**53**			
	ZP-NM	46	32	5	9
	ZP-PR	7	1	1	5
Tier 2		**3**			
	ZP-EM	1	0	0	1
	ZP-SM	2	1	0	1
Tier 3		**6**	1	2	3
Tier 4		**15**	3	0	12
4.0+ Ranked Sites w/ 250+ Acres		77

unreconciled w/ ZP
(further review)

57

4.0+ Ranked SSI Sites
existing in ZP Portal
before local review

187

Project Summary…

- Phase I: Conduct a review of all SSI Sites with an SSI Ranking of 4 and above. These sites are considered premium sites that fit all or most of the geographic criteria needed for the industry.

- Phase II: Continue the review on all SSI sites with 250 or more acres, regardless of the SSI Ranking.

- Phase III: Complete the review of all remaining SSI Sites.

How this information may be used…

- Demonstrate SSI Program ROI.
- Derive an understanding of general site competitiveness for current ZoomProspector sites.
- Provide incentive for LEDO’s to schedule their SSI Phase I local sites review workshop.
