SSI PHASE I: SITE DISCOVERY

HUNTINGTON COUNTY, INDIANA

October 2024

LOCAL SITES REVIEW WORKSHOP

The final step in SSI Phase I: Site Discovery, the local sites review workshop seeks municipal and county official and utility partner input to vet newly discovered greenfield sites. These local stakeholders provide invaluable insight to understanding the viability of each SSI Phase I site as an economic development real estate asset. Information regarding planned development, land use and zoning, utility access and capacity, and infrastructure improvements is learned about each site. The goal is to gain a consensus for which sites should be considered for strategic site inventory pursuit. Sites are ranked through the review process for priority interest and advancement to market through landowner engagement, due diligence, and development positioning through the entitlement process.

SSI Portal Registration

The SSI Portal is an interactive mapping application for managing SSI Program site data. Using the SSI Portal, SSI Program stakeholders can track progress of potential sites through the various phases of strategic site inventory development with a convenient means for display and delivery of content in the form of maps, tabular summaries, and reports. The SSI Portal includes a interactive street and high-res aerial base maps and pertinent GIS data layers.
