Legend

SSI Phase I Potential Site

- Megasite (5)
- Heavy Industrial (232)

SSI Expanded Phase I Potential Site

- Light Industrial (402)
- Heavy Agribusiness (112)
- General Agribusiness (970)
- Interstate
- County Post-Reviewed (26)
- County Not Reviewed (68)

The Strategic Sites Inventory (SSI) Program is an advance site selection initiative designed to identify a community's optimal greenfield sites for quality job-producing projects. The SSI Program increases community competitiveness in economic development through strategic development of high-quality industrial and commercial real estate assets. Developed from consulting expertise in site selection, engineering, and environmental consulting, SSI sites strike a balance between meeting facility construction and operational requirements and protecting vulnerable cultural, environmental, and ecological resources. An investment in a quality sites inventory will enable economic developers to respond quickly and confidently to RFIs and proactively market their communities to site consultants and industry prospects worldwide. The SSI Program with one strategy in mind: **Quality Sites = Quality Projects = Quality Jobs**
